

## Pathway Health Services

Providing pathways to excellence in health care

Explore **quality patient outcomes**  
with the *right* guide.

**With Pathway Health Services as your guide, you have expert resources and tools to avoid unnecessary hospital transfers.**

Starting October 1, 2012, the Hospital Readmissions Reduction Program (HRRP) will start to flex its muscle, as Medicare will begin to recover payments from hospitals for unnecessary readmissions within 30 days of discharge.

### The Pathway Advantage

Our best practice approach combines the implementation of INTERACT II Tools with expert support, resources and educational programs, including best-in-class services and partnership alignment to avoid unnecessary hospital transfers.

#### Strategic Positioning

**Quality Outcome-Driven Focus** – From the right data, tracking quality outcomes, benchmarking performance to best practices and forming strategic alliances, Pathway can position your organization for success.

#### Practical Guidance

**The Pathway Rehospitalization Reduction Assessment®** – Expert navigation and guidance to keep your team and operations moving in the right direction. Also, training for organization leadership on rehospitalization preparation and implementation strategies.

#### Knowledge and Resources

**Webinars, onsite training and classroom education** – For post-acute leaders, clinicians and the Interdisciplinary Team to enhance their skills to conquer disease state management challenges and the rehospitalization journey.

#### Tools for an Integrated, Systematic Approach

**The Rehospitalization Reduction Toolkit®** – Includes processes for integration of INTERACT II, step-by-step guidance for solid rehospitalization plans, education pathways, documentation protocols, benchmark tools and much more!

**Let Pathway be your guide. Contact our experts to learn how to stay on the right path to unnecessary hospital transfers.**
